**Subject:** WES Report  
**Privilege:** None

For your information.

Just received word that the WES report is being Fed Ex'd today. Paul Rubenstein advised that the current draft includes certain management recommendations and discussions on further work in the area of discovery.

During Wednesday's pre-mediation session Paul assured the Departments of Justice, Interior and the tribal representatives that the WES report would contain only scientific observations and interpretations. Lillian Wakeley from WES now understands that, while her recommendations may be entirely valid, they cannot be in the main body of her work. Rubenstein explained to her that she has options, such as the preparation of recommendations as a stand alone volume.

Linda and Jim (OC) have been advised of this.
